系列三相高精度全自动交流稳压器
Series Three Phase Automatic Voltage Regulator

◆概述/Introduction

TNS系列高精度全自动三相交流稳压器，由单相TND(SVC)系列高精度全自动交流稳压器组合而成，三相分相调节，保证各相电压稳定安全，电网输入为三相四线制，星形(Y形)接法，输出可用三相四线制或三相三线制，由三只电流表分别指示各相的电流，由一只按钮开关和一只电压表换档检测输入输出线电压0.20KVA及以上规格TNS系列高精度自动三相交流稳压器，由三只相应规格的单相自动稳压电源构成，采用自动式。

TNS series automatic voltage regulator is combined with single phase TND(SVC) series automatic voltage regulators, it regulate the three phase voltage separately to ensure the voltage of every phase safe and stable. It is 3 phase 4 lines, star(Y type) connection, the output can be 3 phase 3 lines or 3 phase 4 lines. There are 3 current meters indicating the current of each phase and a voltage meter with a switch indicating the voltage of each phase.
